

JOSIE HUGHES

Applied Quantitative Ecologist

josie.s.hughes@gmail.com | jshughes.org | 416-526-9756

Education

- 09/2006 - 04/2012 PhD. University of Toronto. Ecology and Evolutionary Biology. Patterns and processes in forest insect population dynamics. With M.J. Fortin.
- 09/1999 - 12/2002 MRM. Simon Fraser University. Resource and Environmental Management. Modeling the effect of landscape pattern on mountain pine beetles. With K. Lertzman.
- 09/1994 - 04/1998 BSc. University of British Columbia. Ecology and Environmental Biology. Ecology and the evolution of biphasic life cycles. With S.P. Otto.

Experience

Professional Experience

- 01/2018 - present Research Scientist, Landscape Science And Technology Division, Environment and Climate Change Canada
Landscape modelling to support conservation planning.
- 09/2016 - 03/2018 Quantitative ecologist at [Apex Resource Management Solutions Ltd.](#)
Implemented [rsyncrosim](#), an R interface to the [SyncroSim/ST-Sim](#) software framework for stochastic landscape simulation modelling. Parameterized and analyzed a caribou demographic model for Environment Yukon using hierarchical Bayesian techniques. Assisted with parameterization and analysis of land cover change models for The Ontario Ministry of Natural Resources and Forestry and The Nature Conservancy.
- 11/2003 - 03/2011 [BCMPB: Mountain pine beetle projection model](#)
Consultant to the BC Forest Service and Gowlland Technologies Ltd.
Assisted with a provincial-scale spatial model to inform mountain pine beetle control and salvage policy that continues to be used. Responsible for implementing and supporting the beetle submodel using the SELES landscape simulation modelling platform.
- 02/2003 - 12/2005 [LuMPB: Mountain pine beetle decision support](#)
Consultant to Gowlland Technologies and the Canadian Forest Service.
Assisted with analysis of a mountain pine beetle management model using the SELES landscape simulation modelling platform.
- 2001 [Salvaging Solutions: Science-based management of BC's pine beetle outbreak](#)
Consultant to The David Suzuki Foundation, Forest Watch of B.C. and The Canadian Parks and Wilderness Society.
Co-wrote a review and critique of mountain pine beetle management in BC.

Experience (continued)

Research Experience

- 09/2013 - 08/2016 Modelling and analysis to support antimicrobial stewardship
Postdoctoral Fellow. York University. Supervised by J. Wu and A. Morris.
Developed [indices to summarize the impact of antibiotic resistance on empiric therapy](#), modelled [the impact of antimicrobial de-escalation](#), analyzed variation in resistance over time and among units, and analyzed [variation in drug use over time](#).
- 09/2006 - 05/2012 Patterns and processes in forest insect population dynamics
PhD. University of Toronto. Supervised by M.J. Fortin.
Investigated [effects of landscape configuration on spatial models of host-parasitoid \(forest tent caterpillar and larch budmoth\) population dynamics](#). Developed [an approximation technique to simplify integrodifference model analysis and parameter estimation](#). Analyzed [the effects of jack pine budworm defoliation on pollen cone production](#) in collaboration with V. Nealis and J. Régnière (Canadian Forest Service). Analyzed [mountain pine beetle spread patterns](#). Developed R and Python coding skills to efficiently handle computationally demanding models using clusters.
- 09/1999 - 11/2002 [Modelling the effect of landscape pattern on mountain pine beetles](#)
MRM. Simon Fraser University. Supervised by K. Lertzman
Built a spatial model of mountain pine beetle population dynamics using the SELES modelling platform in collaboration with A. Fall (Gowlland Technologies) and L. Safranyik (Canadian Forest Service).
- 05/1998 - 10/1998 Fire history in a steep southern BC valley.
Field assistant. Simon Fraser University. Supervised by K. Lertzman
Tree coring, vegetation id, orienteering and camp management.
- 05/1997 - 04/1998 [Ecology and the evolution of biphasic life cycles](#)
Honours thesis. University of British Columbia. Supervised by S.P. Otto
I constructed and analyzed a model of haplo-diploid life cycle evolution.
- 05/1996 - 09/1996 Snowshoe hare population dynamics.
Field assistant. University of British Columbia. Supervised by C. Krebs
Radio telemetry for a study of juvenile snowshoe hare mortality.

Teaching Experience

- Spring 2016 Guest lecture - ENVS 3440 Resource Management
Environmental Studies, York University.
Lectured on mountain pine beetle ecology and management.
- Fall 2011 Teaching assistant - BIO 120 Adaptation and Biodiversity
Ecology and Evolutionary Biology, University of Toronto.
Responsible for answering questions about lecture content (1200 students) and proofing test questions.
- Spring 2009, 2010, and 2011 Teaching assistant - EEB 319 Population Ecology
Ecology and Evolutionary Biology, University of Toronto.
Responsible for teaching a lab section and marking.

Experience (continued)

- Spring 2010 and 2011 Teaching assistant - EEB 225 Biostatistics Ecology and Evolutionary Biology, University of Toronto. Lectured on logistic regression and linear modelling. Assisted with development of tutorials, answering tutorial questions, and marking.
- Spring 2009 and Fall 2011 Guest lecture - EEB 375 Environmental Factors and FOR 307 Forest Insect Ecology and Management Ecology and Evolutionary Biology and Forestry, University of Toronto. Lectured on mountain pine beetle ecology and management.
- Spring 2009 Graduate seminar - Toolbox Talks Ecology and Evolutionary Biology, University of Toronto. Lectured on tools and techniques for automated (repeatable) computing.
- Fall 2008 Teaching assistant - EEB 321 Community Ecology Ecology and Evolutionary Biology, University of Toronto. Assisted with tutorials and marking.
- Fall 2001 Teaching assistant - Environmental Modelling Resource and Environmental Management, Simon Fraser University. Taught and helped design the computer lab for a 4th year undergrad course.

Invited Seminars and Working Groups

- 9/2016 Workshop on integrodifference equations in ecology at the Banff International Research Station for Mathematical Innovation and Discovery.
- 9/2013 Seminar. Biology, Memorial University of Newfoundland. Host: A. Hurford.
- 10/2011 Seminar. Ecology and Evolution, University of Chicago. Host: G. Dwyer.
- 02/2011 Working group on risks associated with mountain pine beetle spread into the boreal forest for the Canadian Forest Service. Organizer: V. Nealis.
- 01/2011 Seminar. Centre for Mathematical Biology, University of Alberta. Host: M. Lewis.
- 10/2010 - 04/2011 Working group on forest insects at the National Institute for Mathematical and Biological Synthesis (NIMBios). Organizers: M. Pinēda-Krch, M. Lewis and A. Liebhold.
- 10/2007 Working group on spatial models for non-equilibrium systems at the Australian Centre of Excellence for Risk Analysis (ACERA). Organizers: J. Elith, B. Wintle, M. Burgman, M. Wand, and D. Leonte.

Selected Awards

- 2006 - 2008 NSERC Canadian Graduate Scholarship
- 1999 - 2001 NSERC Postgraduate Scholarship A
- 1998 Governor General's Canada Scholarship in Environmental Science
- 1996 - 2000 Paul and Helen Trussell Scholarship
- 1994 - 1998 Canada Scholarship in Science and Engineering
- 1994 UBC President's Entrance Scholarship

Publications

In Review
